

Discovering Automator

Hanaan Rosenthal

To Olivia and Aylam

This book comes with **Free automator actions!**

Over 70 exclusive Automator actions for use with Microsoft Word™, Excel™ and PowerPoint™.

Please download your free actions from:

[URL in printed book!]

About the author

Hanaan Rosenthal lives in Providence RI where he and his wife Johanne are home schooling two sweet kids, two ferrets and a ball python (which is great, since ferrets hate school).

Hanaan has used automation to make people's lives easier for over ten years at companies such as the New York Times, Fidelity Investments, The Boston Globe and Showtime Networks.

In his spare time, Hanaan restores victorian houses, builds furniture for his solar home, and mainly enjoys hanging out with his three favorite people.

Table of Contents

There's Otto in Automation

Automation for the Rest of Us	3
How can Automator do things you want done?	3
What is a workflow?	3
How do I use workflows and actions? .	4
